送布不打滑，稳定过梗不断线

The cloth feeding is not slippery, and the thread is stable over the stalk

采用全新**坦克送料技术**，送料轨迹接触面广，送布更有效；结合新一代高扭矩电机，实现**超强送布不打滑，过梗平稳，机针不发飘**。

The new tank feeding technology is adopted, the feeding track has a wide contact area, and the cloth feeding is more effective. Combined with a new generation of high-torque motor, it can realize super strong cloth feeding without slipping, at the same time with smooth stem passing and needles without fluttering.
